SUMMARY

Software Engineer with 1+ year of co-op and internship experience in cloud applications, workflow automation, and ML pipelines, now building serverless AI applications on AWS. Seeking SDE roles.

EDUCATION

Bachelor of Computer Science, Honours Co-op Sep 2022 – Apr 2027 (Expected)
McMaster University *Hamilton, ON*
Cumulative GPA: 8.7/12.0 | Dean's Honour List (Winter 2025) | Engineering Achievement Award (2022)
Coursework: Data Structures & Algorithms, Operating Systems, Networks, Databases, Machine Learning.

SKILLS

Languages: Python, TypeScript, JavaScript, Java, C, C++, SQL, HTML, CSS, Bash
AI/ML: Amazon Bedrock, LLM Agents, RAG, Embeddings, PyTorch, TensorFlow, OpenCV, pandas, NumPy
Cloud: AWS (Lambda, Step Functions, API Gateway, S3, DynamoDB, Cognito, CDK, CloudWatch), Azure
Tools: React, Vite, Flask, REST APIs, Git, GitHub Actions (CI/CD), pytest, JUnit, Linux, Agile

EXPERIENCE

Software Engineer Co-op Sep 2025 – Aug 2026
Ontario Ministry of Public and Business Service Delivery *St. Catharines, ON*

- Engineered staff- and vendor-facing web portals with Power Apps and Power Pages.
- Automated end-to-end service request workflows with Power Automate, cutting manual processing by 30%.
- Integrated apps with Azure and Microsoft 365 for data storage, authentication, and cross-system workflows.
- Built custom HTML, CSS, and JavaScript components to extend platform capabilities beyond low-code limits.
- Ran functional, regression, and AODA accessibility testing, resolving defects to improve reliability.

AI/ML Intern May 2025 – Jul 2025
ArhamSoft (Pvt) Ltd. *Lahore, Pakistan*

- Trained a PyTorch CNN on CIFAR-10 to 92% test accuracy through hyperparameter tuning and data augmentation.
- Deployed the model as a real-time image classification web app with Streamlit.

PROJECTS

Syllabus Agent: AI Deadline Tracker (Python, TypeScript, React, AWS CDK, Amazon Bedrock).
github.com/WassayShahid/syllabus-agent

- Built and deployed a serverless app that turns syllabus PDFs into a deadline database and timeline on AWS Lambda, Step Functions, API Gateway, S3, DynamoDB, and Cognito, defined with AWS CDK.
- Extracted deadlines with Claude on Amazon Bedrock via a strict JSON tool schema, with code validation that recomputes dates and flags bad weights.
- Built a tool-using AI agent with RAG (Titan embeddings) that answers "what's due next week?" with cited syllabus lines.
- Shipped with 44 unit tests, GitHub Actions CI/CD, and CloudWatch alarms and token-usage metrics.

Moodify: Emotion-Based Music Recommender (Python, OpenCV, DeepFace). Real-time AI pipeline that detects facial emotion with 90%+ accuracy and maps it to generated Spotify playlists, cutting recommendation redundancy by 60%.
